

BEEM - Android XMPP - Bug #252

Black BEEM icon in top bar

Affected version:	0.1.x		
Description			
Using a HTC sense UI phone (HTC Hero) means that the Beem icon is barely distinguishable on the black background of the top android bar.			
A solution would be to edit the icon and put a white border around it.

We use a coloured icon now. It should be better on Sense but it's not following the android standard for icons. If anyone want to make icons for us we will be happy to help by providing some icons data.

Please re-open this issue. I can't see any colors in the current icon, even when changing the status. Using the (quite widely used) MIUI ROM, I can barely see the icon (see screenshot).
