Target version:	0.1.4		
Description			
<p>Found on Android 1.5, on screen keyboard phone. If i would like to change my status (to offline for example) the focus is at the place where i can enter my status message. For my point of view its not a good idea to put the focus there. If i wanna go offline i dont wanna enter a status message. So i have to close the on screen keyboard first b4 i do anything. If i want to enter a status message, i put the focus on it and the keyboard opens.</p> <p>Would it be possible to change this?</p>
