

BEEM - Android XMPP - Bug #256

Beem doesnt vibrate at all

04/12/2010 08:46 PM - Anonymous

Status:	Closed	Start date:	04/12/2010
Priority:	High	Due date:	
Assignee:	Nikita Kozlov	% Done:	100%
Category:	User Interface	Estimated time:	1.00 hour
Target version:	0.1.4	Locale:	
Affected version:	0.1.x		
Description Android Version: 1.5 Mobile Phone: Huawei U8220 aka. T-Mobile Pulse Phone doesn't vibrate on incoming message, no matter if the phone is in "loud"- or "vibrate"- mode. (Since this feature is mentioned in the docs, i set the priority to high) Thx

Thanks for reporting this issue.

Did you set the options in the preference for notification on vibrate ? I thinks it is not enabled by default.

The expected behavior is to vibrate only when displaying a notification because an incoming message comes from an hidden chat.

It may be an interesting features to add an option to vibrate on a displayed chat too.

I think we have made a big error in translation ... really sorry about that.

The option is actually to disable the vibration on notification. So to enable it the option must not be checked (contrary to the english text).
