Hi,
This issue tracker is for the Beem project. We are not using spark.

If you want to use smack library, the xmpp file transfer code is in the package org.jivesoftware.smackx.filetransfer with documentation at
http://www.igniterealtime.org/builds/smack/docs/latest/javadoc/org/jivesoftware/smackx/filetransfer/package-summary.html

I suggest you to ask your questions about spark and openfire at http://community.igniterealtime.org/community/developers/spark_dev
