BEEM - Android XMPP - Feature #391

Notification should bring me to the last screen

01/22/2012 11:18 PM - Anonymous

Target version:				

Description

Currently, tapping the notification brings me to the "change status" screen. It should bring me to whatever I had open last so I can quickly jump back to my conversation/rooster/settings screen. What I am looking for is pretty much the behaviour of tapping the launcher itself.
