BEEM - Android XMPP - Bug #399

User subscription can stay unanswered but doesn't show anywhere

01/26/2012 12:15 PM - Anonymous

Status:	New		**Start date:**	01/26/2012

Target version:				
Affected version:	0.1.6		**Locale:**	

Description

I used my gajim account to add my beem account. I received a notification of beem "Authorization request" and opened the notification. I got a black screen (last thing I did in beem before that happened was an open chat window to a different contact). I pressed the return button and got back to my chat. However the subscription request is now gone and I can't get it back. Sending a new one from gajim to beem fails with "already sent". This should clearly not happen.

Sorry, my mistake, gajim says 'request sent', it looks like it's indicating that it sent it again. beem however does nothing to show it again.
