- Status changed from New to Assigned

- Assignee set to Frédéric Barthéléry

- Priority changed from High to Normal

Basically, there is few steps to follow to compile Beem with eclipse :

- Create an Android project from existing source
- Set the java compiler compliance to 1.6 : In project property, go to Java Compiler and change the Compiler complance level
- Add the libraries in the classpath : In project property, go to Java Build Path, tab Libraries, click on the Add JARs... button, then select libs/asmack-android-7-beem.jar and libs/lcrypto-jdk16-146-20110415.jar

I am sorry I just registerd an account. Already tried what you said but I get errors about variables not resolved.

#3 - 01/30/2012 09:07 PM - Frédéric Barthéléry

Which variables are unresolved ?
Are you sure you add the two jars in the build path?
You should try to refresh and clean the project sometimes eclipse don't set up the new configuration until it is done.

#4 - 01/30/2012 10:21 PM - Loop Back

You need to setup android sdk in the project - it is not set by default and so all Ressources wont be available...
And: It might not work if you do not have the right android sdk version - you may need to correct androidmanifests targetsdk var...

#5 - 01/31/2012 11:34 AM - Vincent de Wit

Checked it and still got the errors.There are more then 1000 errors.Here are some errors:

Description   Resource   Path   Location   Type
AsymmetricCipherKeyPair cannot be resolved to a type   OtrCryptoEngineImpl.java   /Login2/src/net/java/otr4j/crypto   line 51   Java Problem
available cannot be resolved to a variable   PresenceType.java   /Login2/src/com/beem/project/beem/utils   line 90   Java Problem
Base64 cannot be resolved   AvatarExtension.java   /Login2/src/com/beem/project/beem/smack/avatar   line 69   Java Problem
Base64 cannot be resolved   OtrKeyManagerImpl.java   /Login2/src/net/java/otr4j   line 99   Java Problem
Base64 cannot be resolved   SerializationUtils.java   /Login2/src/net/java/otr4j/io   line 208   Java Problem
Base64 cannot be resolved   SerializationUtils.java   /Login2/src/net/java/otr4j/io   line 265   Java Problem
I hope you can help me.

#6 - 01/31/2012 01:58 PM - Frédéric Barthéléry

The two jars are not in the build path so most of the class cannot be found.
Re try the procedure, I gave you early
