| Description | | | |
| Any idea about video chat using XMPP and smackx jingle API in Android. I can not able to find good Sample code to start. | | | |

History

#1 - 03/05/2012 10:39 AM - Frédéric Barthéléry

- Category set to XMPP-Jingle
- Status changed from New to Feedback
- Assignee set to Nikita Kozlov

In the jingle repository <http://beem-project.com/hg/jingle/> Nikita manage to implement audio call in a local network with smackx-jingle api and some code from sipdroid.
You can take a look at it but it is currently unmaintained.
