<b>Description</b>			
I install as the suggestion at <a href="http://beem-project.com/projects/beem/repository/entry/INSTALL">http://beem-project.com/projects/beem/repository/entry/INSTALL</a> But receive the error: build.xml: Found version-tag:custom. File will not be update. when excute the android update project. Hope that somebody can help me. Thank you so much. :)

This is not an error. We have some modifications in the build.xml file and we don't want it to be override by android update project.
